The NYISO hereby certifies it has met the requirement defined by the level of compliance as certified below:

Levels of Compliance

<input checked="" type="checkbox"/> Full (100%) Compliance	The NYISO certifies that all applicable generation owners performed tests to verify the reactive power capacity for their generators, and reported these test results to the NYISO as specified by NYISO procedures and schedules under Measurement C-M1, in accordance with Measurement C-M3.
<input type="checkbox"/> Non-Compliance Level 1	The NYISO certified that one or more generation owners failed to submit test results to the NYISO on schedule.
<input type="checkbox"/> Non-Compliance Level 2	The NYISO certified that generator reactive power capacity verification testing reports were incomplete in one or more areas for one or more generator owners, as specified by NYISO procedures.
<input type="checkbox"/> Non-Compliance Level 3	Not applicable.
<input type="checkbox"/> Non-Compliance Level 4	The NYISO certified that generator reactive power capacity verification tests was either not completed, or testing results not provided to the NYISO, as specified by NYISO procedures and schedules, for one or more generator owners.

Compliance Templates NYSRC Reliability Rules

Comments: All generators submitted reactive power test results according to procedures and schedules for the Summer 2009 test period, as required by Section 3.6 of the Ancillary Services Manual.
