1. Indian Point 2 and 3 Retirement Sensitivity

Gregory Drake (NYISO) reported on the final result of the removing Indian Point 2 and 3 from the model as a sensitivity case. The LOLE of the system was 0.93 and it is almost 10 times above the acceptable reliability criteria.

2. Monte Carlo Error Analysis

Mr. Drake and Dr. Kai Jiang (NYISO) reported on the Monte Carlo error analysis on the range of possible IRM. The error analysis was of interest because the original reported version of the IRM range was actually a skewed distribution in the draft report. The concern the NYISO had was that the base case converged much faster (required less iterations) than in the past. The minimum amount of iterations came from a previous agreement that the case needs to be calculated with a minimum of 1000 iterations to be statistically significant. As a result, the NYISO went back and determined that if the case was at an IRM of 16.9% (as opposed to 17%), the case would have achieved the reliability criteria of 0.1

LOLE at a minimum of 1000 iterations. In fact, the 17% IRM model would not have yielded 95% confidence level at 1000 iterations since the standard error is 0.023, not 0.025 at the 1000th iteration.

Gregory Chu (Con Edison) asked about the 2 normal curves shown on the screen at the meeting, being that increasing number of iterations does not actually change the IRM itself, how did the NYISO determine the IRM without doing a separate run at each new IRM? He postulated that the 2 curves must be from separate runs since increasing number of iterations actually changes the LOLE output of the model. Dr. Jiang confirmed that it is indeed the case, where the 2 normally distributed curves showed the distribution of 2 distinct model runs for them to determine what the IRM would be. Dr. Jiang will be providing a brief write-up of the relationship between confidence interval and the NYISO's methodology to obtain the IRM range at the next ICS meeting, per Vice Chairwoman Erin Hogan (NYSERDA) request. **(AI 154-1)**

3. 2014 IRM Study Draft Report

The members reviewed the final draft of the report prior to sending it to the Executive Committee. Both the appendices and the body were thoroughly combed through and typos and edits were corrected at this meeting. ICS members approved this final version at the meeting and the clean version of this report will be heading to the EC for approval at their meeting on Friday, December 6th.

Secretary: Gregory Chu
