

Action Items List From Meeting #165 October 28th, 2014

New York State Reliability Council - Installed Capacity Subcommittee

[Fade out items denotes Action Item has been completed]

[Bold dates denotes items that are behind schedule or due for the next meeting]

NO.	Action Item	Responsible Individual(s)	Sched./ Actual Comp. Dates
108-1a	<p>The NYISO to comment if the priority of exports is modeled correctly in MARS, in adherence of the Planning Requirements. If not, the NYISO to recommend proper export modeling.</p> <p>Request for the NYISO to coordinate with the outside ISOs to verify that the priority for exports represented in the modeling is consistent with outside ISOs understanding of inter ISO agreements for planning.</p>	<p>NYISO/ G. Drake</p>	<p>08/30/10 1/28/14</p>
108-1b	<p>ICS would like documentation explaining how internal and external transmission limitations are affected by different contract modeling options. Circulate inter ISO agreements.</p>	<p>NYISO/ Henry Chao</p>	<p>08/30/10</p>
134-4	<p>The NYISO to model exports' impact on the internal transfer limits. I.e. Placing the unit at Niagara Falls versus placing it at the border to NE.</p>	<p>NYISO</p>	<p>5/29/12</p>
135-1	<p>Chairman Bob Boyle to consult with Curt Dahl on past study regarding export effect on internal transfer limits (see 134-4)</p>	<p>B. Boyle</p>	<p>5/29/12</p>
158-3	<p>Transmission system outage working group to meet separately and create a schedule</p>	<p>TSO WG</p>	<p>TBD</p>
160-9	<p>The NYISO to provide results of updating for large hydro derate</p>	<p>NYISO/G. Drake</p>	<p>TBD</p>
161-5	<p>The NYISO to provide justification to consider a different, less extreme, load shape than 2002</p>	<p>NYISO/G. Drake</p>	<p>TBD</p>
162-1	<p>The NYISO to note in the IRM report the unusual bump in Zone K's LFU curve</p>	<p>NYISO/G. Drake</p>	<p>10/1/14</p>
162-2	<p>The NYISO to look back at the frequency of curtailment to external areas in the past 5 years(108-1)</p>	<p>NYISO/G. Drake/W. Yeoman</p>	<p>9/3/14</p>

162-3	Mark Younger to provide the NYISO question(s), limited to yes/no response only, on action item 108-1 based on their presentation and receive a response from ISO-NE	NYISO/G. Drake	9/3/14
165-1	The NYISO to provide to Con Edison and LIPA the new tangent 45 with load correction	NYISO/G. Drake	10/31/14
165-2	Al Adamson to provide a footnote in table 7-1 that states limited PJM DR is explained in table 5-1	A. Adamson	10/30/14
165-3	The NYISO to remove category for sensitivity cases in the appendix section	NYISO/G. Drake	10/30/14
165-4	The NYISO to provide the result of error analysis in the report by 11/5	NYISO/G. Drake	11/5/14
165-5	All report comments due to Al Adamson by 10/30	ICS	10/30/14
165-6	All appendix comments due to John Adams by 11/14	ICS	11/14/14
165-7	John Adams to circulate revised appendix to all ICS members	J. Adams	11/19/14
165-8	The NYISO to perform a special sensitivity case for setting the flow limits to 0 MW from J to J4 (HTP reverse flow at 0)	NYISO/G. Drake	10/31/14
