I. INTRODUCTION

1. Foreword

This document contains the New York State Reliability Council, L.L.C. (NYSRC) Compliance Templates for the Reliability Rules for Planning and Operating the New York State Power System (Compliance Templates). The Compliance Templates are guides for use by the NYSRC and New York Independent System Operator (NYISO) by which compliance with the Reliability Rules are reviewed and evaluated.

2. Background

The mission of the NYSRC is to promote and preserve the reliability of the New York State Power System in the New York Control Area (NYCA). The NYSRC carries out its mission in accordance with the NYSRC and NYISO/NYSRC Agreements.

This mission includes developing, maintaining, and updating the Reliability Rules, which must be complied with by the NYISO and Market Participants. The Reliability Rules are contained in the document, "NYSRC Reliability Rules for Planning and Operating the New York State Power System."

The NYSRC mission also includes monitoring compliance with the Reliability Rules. NYSRC Policy 4, "Procedure for Monitoring Compliance with the NYSRC Reliability Rules," describes the compliance monitoring process. The Compliance Templates are an essential element of this process. Policy 4 describes the application of the Compliance Templates within the context of the entire NYSRC compliance review process.

The Reliability Rules, NYSRC Policy 4, Compliance Templates, and other NYSRC documents may be downloaded from the NYSRC web site, http://www.nysrc.org.

3. Application of the Compliance Templates

A compliance template provides the requirements for achieving full compliance with a measurement associated with one or more Reliability Rules, in addition to factors which may contribute to non-compliance. The compliance template assists those entities responsible for complying with the Reliability Rules, as well as those entities responsible for monitoring compliance with the Reliability Rules.

The NYISO is responsible for achieving compliance with all of the measurements covered by the Compliance Templates. The NYSRC Reliability Compliance Monitoring Subcommittee (RCMS) is responsible for monitoring NYISO compliance with those measurements for which the NYISO has direct responsibility for achieving compliance, using the Compliance Templates.

Market Participants (Transmission Owners, Generation Owners, Installed Capacity Providers, Blackstart Providers, Equipment Owners, Developers, and LSEs) are directly responsible for achieving compliance with certain measurements. There is a dual compliance monitoring process for these measurements. First, the NYISO is responsible for monitoring Market Participant compliance with those measurements, and is encouraged to use the Compliance Templates for this process. Second, the NYISO prepares a statement in which it certifies that it has found a Market Participant either in full compliance or non-compliance with a measurement. The certification includes the NYISO's compliance evaluation and applicable references. RCMS reviews the NYISO certification and determines whether the NYISO is subject to a finding of full compliance or non-compliance in accordance with the Compliance Templates. A non-

compliance finding is designated when the NYISO cannot certify that a market participant is in full compliance (note that the NYISO is responsible for achieving compliance with all measurements – see NYSRC Policy 4 for more details.

Since more than one measurement may be applicable to a given Reliability Rule, measurements may be addressed as a group to determine if compliance to a particular Reliability Rule is achieved.

The Compliance Templates are supplemented or revised as measurements are added or modified.

4. Compliance Template Format

The format of the compliance template is shown in Table 1. A description of each major heading in the template is included.

5. Violations of NYSRC Compliance Requirements

Non-monetary sanctions for violations of requirements stated in the compliance templates are imposed in the form of letters to the NYISO officers and/or regulatory bodies. These letters are described in Policy 4. Policy 4 also covers NYSRC procedures when compliance documentation from the NYISO is overdue.

6. Compliance Template Index

Table 2 is a Compliance Template index shows for each compliance template -- the applicable measurement, the related Reliability Rule(s), the entity responsible for complying with the measurement (applicable entity), the entity responsible for monitoring compliance, and compliance report frequency.

TABLE 1: COMPLIANCE TEMPLATE FORMAT

- Reliability Rule Section and Measurement Number: As in Reliability Rule document.
- Reliability Rule Reference(s): The number and name of related Reliability Rule(s). The wording of the Reliability Rule(s) may be found in the "NYSRC Reliability Rules for Planning and Operating the New York State Power System" Manual.
- **Measurement:** The number and exact wording of the template measurement as in the Reliability Rules document. A measurement identifies what actions are to be performed or what outcomes are to be achieved, for complying with the related Reliability Rule.

• Compliance Monitoring Process:

<u>Compliance Documentation Reporting Responsibility</u>: This is the entity responsible for complying with the measurement and submitting documentation showing the actions that have been performed for achieving compliance.

<u>Compliance Monitoring Responsibility</u>: This is the entity responsible for evaluating compliance documentation or certification statements to assess whether the data or other information reported complies with the requirements in the measurement. When a market participant is responsible for complying with a measurement, a duel NYISO/RCMS compliance process described in Section 3 is implemented.

<u>Compliance Documentation Reporting Frequency</u>: The frequency or timetable for providing required documentation.

- Full (100%) Compliance: Clear statement of compliance reporting requirements for demonstrating compliance with the measurement. The statement may include references to related Reliability Rules and measurements.
- **Levels of Non-Compliance:** In increasing levels of non-compliance. Some levels may not be applicable.
 - Level 1
 - Level 2
 - Level 3
 - Level 4
- Full (100%) Compliance: Clear statement of compliance reporting requirements for demonstrating compliance with the measurement. The statement may include references to related Reliability Rules and measurements.
- **Levels of Non-Compliance:** In increasing levels of non-compliance. Some levels may not be applicable.
 - Level 1
 - Level 2
 - Level 3
 - Level 4

Table 4 Footnotes

- 1 Entity responsible for achieving compliance with the measurement and submitting compliance documentation.
 - ICS Installed Capacity Subcommittee
 - LSE Load Serving Entity
 - GO Generation Owner
 - ICP Installed Capacity Provider
 - TO Transmission Owner
 - DEV Developer
 - MP Market Participant
 - EO Equipment Owner
 - BP Blackstart Provider
 - RIP Responsible Interface Party
- 2 See Section 3 and Table 1, Compliance Template Format, for an explanation of the dual NYISO/RCMS compliance monitoring process.

II. COMPLIANCE TEMPLATES

RESOURCE ADEQUACY

A-M1

Reliability Rule Reference

A-R1 NYCA Installed Reserve Margin Requirement

Measurement

A-M1 The NYSRC shall periodically perform resource adequacy studies to update the required statewide installed reserve margin. A report shall be prepared providing the assumptions, procedures, and results of the study.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility: Installed

Capacity Subcommittee (ICS)

Compliance Monitoring Responsibility:

Review of ICS Compliance Documentation – RCMS

Compliance Documentation Reporting Frequency: On Request

☐ Full (100%) Compliance	The NYSRC Installed Capacity Subcommittee conducted the
	annual resource adequacy study for the following capability
	period, and reported the results of the study in accordance with
	Measurement A-M1.
□ Non-Compliance Level 1	Not applicable.
☐ Non-Compliance Level 2	A report was submitted, but was incomplete in one or more areas.
□ Non-Compliance Level 3	Not applicable.
□ Non-Compliance Level 4	A report was not submitted.

RESOURCE ADEQUACY

A-M2

Reliability Rule Reference

A-R2 LSE Installed Capacity Requirement

A-R3 External Installed Capacity

Measurement

A-M2 The NYISO shall prepare a report for the next capability period showing (1) LSE installed reserve margin and capacity requirements so as to meet statewide installed reserve margin requirements, (2) LSE locational installed capacity requirements for applicable NYS zones, such as New York City and Long Island, and (3) the allowable amount of LSE ICAP requirements that may be located externally to the NYCA. The report shall include the procedures, factors, and assumptions utilized by the NYISO to determine these LSE ICAP requirements. The NYISO Installed Capacity Manual shall include procedures to establish LSE ICAP requirements.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility:

NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: Annually

□ Full (100%) Compliance	The NYISO conducted the annual analyses to establish LSE and locational installed capacity (ICAP) requirements for the next capability year. The analyses were based on NYCA ICAP requirements established by the NYSRC and utilizes models and assumptions consistent with those used by the NYSRC for its ICAP requirement study. A report was prepared in accordance with Measurement A-M2, which addresses the results of the study, models utilized, study procedures and assumptions, and other study considerations. The report demonstrates that the LSE and locational ICAP requirements established by the NYISO meets NYSRC Reliability Rules.
☐ Non-Compliance Level 1	Not applicable.
□ Non-Compliance Level 2	The NYISO report, or analyses of LSE and locational ICAP requirements, was incomplete in one or more areas.
□ Non-Compliance Level 3	Analyses of LSE and locational ICAP requirements did not meet NYSRC Reliability Rules, or did not meet NYCA ICAP requirements established by the NYSRC.
☐ Non-Compliance Level 4	Analyses of LSE and locational ICAP requirements were not provided.

RESOURCE ADEQUACY

A-M3

Reliability Rule Reference

A-R2 LSE Installed Capacity Requirement

A-R3 External Installed Capacity

Measurement

A-M3 Each LSE shall certify and maintain its ICAP obligation for the next capability period, including any locational and external installed capacity, in accordance with LSE ICAP requirements established by the NYISO Tariff and the NYISO Installed Capacity Manual.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility: Load Serving Entities

Compliance Monitoring Responsibility:

- 1. Review of Load Serving Entity Compliance Documentation NYISO
- 2. Review of NYISO Compliance Certification RCMS

Compliance Documentation Reporting Frequency: On Request

☐ Full (100%) Compliance	Each LSE demonstrated that it procured sufficient capacity from Installed Capacity Suppliers to meet its ICAP requirement, in
	accordance with Measurement A-M3.
□ Non-Compliance Level 1	Not applicable.
□ Non-Compliance Level 2	Not applicable.
□ Non-Compliance Level 3	Not applicable.
□ Non-Compliance Level 4	The LSE fails to comply with NYISO requirements to demonstrate that it procured sufficient capacity to meet its ICAP obligation.

RESOURCE ADEQUACY

A-M4

Reliability Rule Reference

A-R2 LSE Installed Capacity Requirement

Measurement

A-M4 The NYISO shall notify those LSEs that are determined to be deficient in meeting their ICAP requirements, including locational installed capacity requirements, for the next capability period. This notification shall specify appropriate deficiency charges. The NYSRC shall be immediately notified of such capacity deficiencies, including any measures that may be planned to minimize reliability impacts.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility: NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: As Required

☐ Full (100%) Compliance	The NYISO immediately notified the NYSRC that a LSE failed
	to demonstrate that it meets its ICAP requirement for the next
	capability period, in addition to other requirements specified in
	Measurement A-M4.
□ Non-Compliance Level 1	Not applicable.
☐ Non-Compliance Level 2	Not applicable.
□ Non-Compliance Level 3	Not applicable.
□ Non-Compliance Level 4	The NYISO did not notify the NYSRC when an LSE failed to
	demonstrate that it meets its ICAP requirement for the next
	capability period.

TRANSMISSION CAPABILITY - PLANNING

B-M1

Reliability Rule Reference

B-R1	Thermal Assessment
B-R2	Voltage Assessment
B-R3	Stability Assessment
B-R7	Fault Current Assessment

Measurement

B-M1 The NYISO shall ensure that the thermal, voltage, short-circuit, and stability performance of the NYS Bulk Power System, as planned, is in accordance with NYSRC thermal, voltage, fault duty, and stability assessment criteria, and applicable NPCC Criteria.

Compliance Monitoring Process

Computative Monitoring Process		
Compliance Documentation Reporting Responsibility:		
NYISO		
Compliance Monitoring Responsibility: Review of NYISO		
Compliance Documentation – RCMS		
Compliance Monitoring Reporting Frequency: Annually		

☐ Full (100%) Compliance	The NYISO assessed the performance of the planned NYS bulk power transmission system in meeting thermal, voltage, fault duty and stability criteria in accordance with NYSRC Reliability Rules B-R1, B-R2, B-R3, and B-R7. These assessments must indicate that the planned NYS bulk power transmission system is compliant with Reliability Rules. Documentation of results of these reliability assessments were reported for the current year to
	the NYSRC in accordance with Measurement K-M2.a.
□ Non-Compliance Level 1	The NYISO assessment was completed and submitted. However, the NYS bulk power transmission system was found to be non-compliant with Reliability Rules B-R1, B-R2, B-R3 or B-R7. The NYISO submitted an acceptable plan and schedule for addressing the area(s) of noncompliance.
□ Non-Compliance Level 2	Not applicable.
□ Non-Compliance Level 3	The NYISO assessment was completed and submitted. However, the NYSRC bulk power transmission system was found to be non-compliant with Reliability Rules B-R1, B-R2, B-R3, or B-R7. The NYISO either failed to submit a plan and schedule to meet the Reliability Rules, or the plan was found to be unacceptable.
□ Non-Compliance Level 4	The NYISO assessment was not submitted.

TRANSMISSION CAPABILITY – PLANNING

B-M2

Reliability Rule Reference

B-R4 Extreme Contingency Assessment

Measurement

B-M2 The NYISO shall assess the risks and system performance resulting from the extreme contingencies in Table B of the NYSRC Reliability Rules, and shall utilize measures, where appropriate, to reduce the frequency of occurrence of such contingencies, or to mitigate the consequences that are indicated as a result of testing for such contingencies.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility:

NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: Annually

☐ Full (100%) Compliance	The NYISO conducted the annual assessment of the risks and
	system performance resulting from extreme contingencies of the
	planned NYS bulk power transmission system in accordance with
	NYSRC Reliability Rule B-R4 and Measurement B-M2. Where
	simulations indicated that the system could become unstable, the
	NYISO documented measures and procedures to mitigate or
	eliminate the extent and effects on system performance and loss
	of customer demand. Documentation of results of these reliability
	assessments were reported for the current year to the NYSRC in
	accordance with Measurement K-M2.a.
□ Non-Compliance Level 1	Simulation testing was completed in accordance with B-R4;
	however, mitigation measures were not fully explored for all
	conditions analyzed.
☐ Non-Compliance Level 2	Not applicable.
□ Non-Compliance Level 3	Not applicable.
☐ Non-Compliance Level 4	Simulation testing was not completed in accordance with B-R4.

TRANSMISSION CAPABILITY - PLANNING

B-M3

Reliability Rule Reference

B-R5 Restoration

Measurement

B-M3 The NYISO shall develop, maintain, and execute procedures to evaluate system expansion or reconfiguration plans and identify their impact on the NYCA SRP. This process shall be performed every year as part of the NYISO annual transmission assessment. Any impacts identified shall be described in terms of how and where the SRP may need to be modified, and made available to the NYISO Operating Group and the operating function of the appropriate transmission owners for consideration in the annual review and update of NYISO and transmission owner restoration plans as required by Reliability Rule G-R1.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility:

NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: Annually

☐ Full (100%) Compliance	The NYISO prepared and adequately implemented a procedure to
	assess the impact of system expansion plans on the NYCA
	System Restoration Plan, in accordance with Measurement B-M3.
□ Non-Compliance Level 1	Not applicable.
□ Non-Compliance Level 2	The NYISO prepared the required procedure, but the procedure
_	was not adequately implemented.
□ Non-Compliance Level 3	The NYISO did not prepare the required procedure.
☐ Non-Compliance Level 4	Not applicable.

TRANSMISSION CAPABILITY - PLANNING

B-M4

Reliability Rule Reference

B-R6 List of NYS Bulk Power System Facilities

Measurement

B-M4 The NYISO shall establish and maintain a procedure for developing a list of NYS Bulk Power System facilities. On request, the NYISO shall submit this procedure and list of NYS Bulk Power System facilities to the NYSRC for review. The NYS Bulk Power System facilities list shall be published in the annual NYISO "Load and Capacity Data Report" or other publication approved by the NYSRC.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility:

NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: On Request

☐ Full (100%) Compliance	The NYISO established and maintained a procedure for
	developing a list of NYS Bulk Power System facilities and
	publish this list, in accordance with Measurement B-M4.
□ Non-Compliance Level 1	Not applicable.
□ Non-Compliance Level 2	Documentation of NYISO procedures for developing and
_	maintaining a list of NYS Bulk Power System facilities was
	incomplete in one or more areas.
□ Non-Compliance Level 3	Not applicable.
□ Non-Compliance Level 4	The list of NYS Bulk Power System facilities was not published
-	as required, or documentation of procedures for developing and
	maintaining the list of NYS Bulk Power System Facilities was not
	provided.

RESOURCE, SYSTEM & DEMAND DATA REQUIREMENTS

C-M1

Reliability Rule Reference

C-R1 Verification Testing of Resource Capacity

Measurement

The NYISO shall establish and maintain procedures for *resource capacity* data verification testing or demonstration for all equipment utilized for providing *installed capacity* and *reactive power capacity* to the NYCA.

The data to be provided to the *NYISO* shall include *resource net dependable capacity* for all resources that are participating in the *NYISO* installed capacity market, and *reactive power capacity* for all resources that are voltage support ancillary service providers. The procedures shall include requirements for resource providers to provide to the *NYISO* the net MW at the time of the DMNC test, and the net MW and gross MVAr quantities taken simultaneously at the time of the *reactive power capability* test. These reactive power tests shall be undertaken for both leading and lagging reactive power operation.

NYISO procedures shall further require that generation equipment owners perform leading reactive power tests once every three calendar years and lagging reactive power tests once every calendar year for all generators that are voltage support ancillary service providers. These tests shall verify the maximum *reactive power capacity* offered into the voltage support service program. The AVR shall be in service at all times during the test. The resource capacity test results reported to the *NYISO* shall include the actual test date(s) for each generator and the MW output at the time of the test.

In addition, *NYISO* procedures shall include a requirement that, following leading reactive power testing, each *generation* equipment owner shall provide a certification to the *NYISO* that the data submitted for the leading reactive power test accurately demonstrates the maximum leading reactive power of the generator at the time of the test.

The *NYISO* shall provide dependable net capacity and gross reactive power capacity data to the operating function of the *Transmission Owner* that the resource connects to, within 60 calendar days following the close of the seasonal capability period or annual test period, respectively. Documentation of the *NYISO* procedures and verification results shall be provided to the *NYSRC* upon request.

17

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility:

NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: On Request

□ Full (100%) Compliance	The NYISO established and maintained resource capacity verification procedures in accordance with Measurement C-M1. The schedule for the testing of generation equipment and the schedule for submission of the verification or tests to the NYISO was included in these NYISO procedures. The dependable net capacity and gross reactive capacity data was forwarded to the
	operating function of the Transmission Owner in accordance with time requirements specified in C-M1.
□ Non-Compliance Level 1	Not applicable.
□ Non-Compliance Level 2	Documentation of NYISO procedures for resource capacity equipment testing did not meet Measurement C-M1 requirements in one or more areas.
□ Non-Compliance Level 3	The NYISO did not provide capacity data to the Transmission Owners within the time requirements specified in Measurement C-M1.
□ Non-Compliance Level 4	Documentation of NYISO procedures for resource capacity equipment testing in accordance with Measurement C-M1 requirements were not provided.

RESOURCE, SYSTEM & DEMAND DATA REQUIREMENTS

C-M2

Reliability Rule Reference

C-R1 Verification Testing of Resource Capacity

Measurement

C-M2 Owners of resources responsible for providing ICAP shall seasonally verify the net dependable capacity of their equipment and report these results to the NYISO in accordance with NYISO procedures and schedules as required in Measurement C-M1.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility: Generation

Owners

Compliance Monitoring Responsibility:

1. Review of Generation Owner Compliance Documentation – NYISO

2. Review of NYISO Compliance Certification – RCMS

Compliance Documentation Reporting Frequency: On Request

☐ Full (100%) Compliance	The NYISO certified that all applicable generation owners responsible for providing ICAP verified the net dependable capacity of their equipment and reported these results to the NYISO as specified by NYISO procedures and schedules under Measurement C-M1, in accordance with Measurement C-M2.
□ Non-Compliance Level 1	The NYISO certified that one generation owner did not submit complete verified dependable net capacity test results to the NYISO as required by NYISO procedures and Measurement C-M2.
□ Non-Compliance Level 2	The NYISO certified that two generation owners did not submit complete verified dependable net capacity test results to the NYISO as required by NYISO procedures and Measurement C-M2.
□ Non-Compliance Level 3	The NYISO certified that three generation owners did not submit complete verified dependable net test results to the NYISO as required by NYISO procedures and Measurement C-M2.
□ Non-Compliance Level 4	The NYISO certified that four or more generation owners did not submit complete verified dependable net capacity test results to the NYISO as required by NYISO procedures and Measurement C-M2.

RESOURCE, SYSTEM & DEMAND DATA REQUIREMENTS

C-M3

Reliability Rule Reference

C-R1 Verification Testing of Resource Capacity

Measurement

C-M3 *Generation* equipment owners shall annually perform lagging reactive power tests for all generators that are voltage support ancillary service providers. *Generation* equipment owners shall perform leading *reactive power* tests once every three calendar years for all generators that are voltage support ancillary service providers. These tests shall verify the maximum reactive power capacity offered into the voltage support service program. Test results shall be reported to the *NYISO*, in accordance with *NYISO* procedures and schedules as required in Measurement C-M1.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility: Generation

Owners

Compliance Monitoring Responsibility:

- 1. Review of Generation Owner Compliance Documentation NYISO
- 2. Review of NYISO Compliance Certification RCMS

Compliance Documentation Reporting Frequency: On Request

☐ Full (100%) Compliance	The NYISO certified that all applicable generation owners
-	performed tests to verify the reactive power capacity for their
	generators, and reported these test results to the NYISO as
	specified by NYISO procedures and schedules under
	Measurement C-M1, in accordance with Measurement C-M3.
□ Non-Compliance Level 1	The NYISO certified that one or more generation owners failed to
	submit test results to the NYISO on schedule.
□ Non-Compliance Level 2	The NYISO certified that generator reactive power capacity
_	verification testing reports were incomplete in one or more areas
	for one or more generator owners, as specified by NYISO
	procedures.
□ Non-Compliance Level 3	Not applicable.
□ Non-Compliance Level 4	The NYISO certified that generator reactive power capacity
	verification tests was either not completed, or testing results not
	provided to the NYISO, as specified by NYISO procedures and
	schedules, for one or more generator owners.

RESOURCE, SYSTEM & DEMAND DATA REQUIREMENTS

C-M4

Reliability Rule Reference

C-R2 Generating Unit Availability and Special Case Resource Performance

Measurement

C-M4 The NYISO shall establish, maintain and follow procedures to address Installed Capacity Provider generating unit outage data reporting requirements and methods of processing outage data. These procedures shall be designed to provide complete, consistent and accurate data to support NYSRC and NYISO reliability studies. This data shall include, but not be limited to, forced, partial and maintenance outage statistics. NYISO outage data reporting and processing procedures shall include the following requirements:

Outage Data Reporting Procedure

- 1. Installed Capacity Provider generating unit outage data reporting instructions.
- 2. Installed Capacity Provider outage data reporting schedules.
- 3. Training programs for Installed Capacity Providers that focus on proper generating unit outage data collection and reporting methods for submission of accurate data to the NYISO.
- 4. The consequences to an Installed Capacity Provider of failing to submit complete, accurate and timely data to the NYISO.

Outage Data Processing Procedures

5. Due diligence NYISO processes for screening of all generating unit outage data received from Installed Capacity Providers. These processes shall be designed to screen outage data and replace misreported outage data or *Suspect Data* with corrected or proxy data as necessary, and shall be employed by the NYISO before the data is used in NYSRC and NYISO reliability studies. On request by the NYSRC, the NYISO shall make available for inspection documentation covering its processes for reviewing and screening outage data.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility: NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: On Request

☐ Full (100%) Compliance	The NYISO had full documentation of its generating unit outage
-	data reporting procedures (Requirements 1-4) and outage data
	processing procedures (Requirement 5), as specified in
	Measurement C-M4. The NYISO made available, on request,
	documentation describing its generating unit outage data
	processes. The NYISO provided documentation showing that it

	has employed its generating unit outage data processes for review and screening of all reported outage data, and corrected misreported outage data or developed proxy data, as necessary,
	before the data was used in NYSRC and NYISO reliability studies.
□ Non-Compliance Level 1	NYISO generating unit outage data reporting and processing procedures were provided, but were incomplete relative to one of the five requirements defined in C-M4. Following a NYSRC request, the NYISO did not make available documentation describing its outage data processes.
□ Non-Compliance Level 2	NYISO compliance documentation showed that not all reported generating unit outage data were reviewed, screened and corrected using the NYISO generating unit outage data process procedure before the data was used in NYSRC and NYISO reliability studies.
□ Non-Compliance Level 3	NYISO generating unit outage data reporting and processing procedures were provided, but were incomplete relative to two of the five C-M4 requirements defined in C-M4.
□ Non-Compliance Level 4	NYISO generating unit outage data reporting and processing procedures were provided, but were incomplete relative to three or more of the five C-M4 requirements defined in C-M4.

C-M5

Reliability Rule Reference

C-R2 Generating Unit Availability and Special Case Resource Performance

Measurement

C-M5 Installed Capacity Providers located in or serving the NYCA shall provide generating unit outage data for their generating units in accordance with NYISO procedures, tariffs and schedules for reporting outage data to the NYISO.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility: Installed Capacity Providers

Compliance Monitoring Responsibility:

- 1. Review of Installed Capacity Provider Compliance Documentation NYISO
- 2. Review of NYISO Compliance Certification RCMS

Compliance Documentation Reporting Frequency: On Request

☐ Full (100%) Compliance	The NYISO certified that, during the time period designated by
Tun (100%) Compliance	the NYSRC, all Installed Capacity Providers reported generating
	unit outage data in accordance with applicable NYISO
	procedures, tariffs and schedules.
☐ Non-Compliance Level 1	The NYISO certified that an Installed Capacity Provider failed to
Tron compliance Level 1	report its generating unit outage data in accordance with NYISO
	data reporting schedules.
□ Non-Compliance Level 2	The NYISO certified that generating unit outage data from an
	Installed Capacity Provider was found to be misreported after the
	data was used in reliability studies.
□ Non-Compliance Level 3	The NYISO certified that generating unit outage data from a
•	single Installed Capacity Provider was found to be misreported
	two or more times over a two-year period, after the data was used
	in reliability studies.
☐ Non-Compliance Level 4	The NYISO certified that an Installed Capacity Provider did not
	report its generating unit outage data in accordance with
	applicable NYISO procedures and tariffs.

Levels of Compliance

☐ Full (100%) Compliance	The NYISO had in place procedures for the development and
	maintenance of load flow, short-circuit and stability data bases,
	including Market Participant and Developer requirements to
	report accurate equipment data, including changes which affect
	these data bases, to the NYISO, in accordance with Measurement
	C-M9. These procedures also addressed time requirements for
	reporting such data. In addition, the NYISO applied data
	reasonableness guidelines for all data provided to the NYISO for
	identifying Suspect Data, as described in C-M9, and requested
	verification or corrections of Suspect Data from the Market
	Participant or Developer that provided the data.
□ Non-Compliance Level 1	Not applicable.
□ Non-Compliance Level 2	NYISO procedures for development and maintenance of load
-	flow, short-circuit, and stability data bases have been prepared,
	but were incomplete in one or more areas.
□ Non-Compliance Level 3	It was determined that the NYISO did not adequately apply its
	guidelines for identifying Suspect Data for certain data provided
	by Market Participants and Developers after a review of

27

	equipment data used in a planning or operating study indicated
	that the data fell outside the range of reasonable data parameters.
□ Non-Compliance Level 4	NYISO procedures for development and maintenance of load
	flow, short-circuit, and stability data bases have not been
	prepared, or the NYISO has not prepared guidelines for
	identifying Suspect Data.

□ Non-Compliance Level 1	The NYISO certified that all Market Participants installed disturbance recording devices as required by NYISO procedures, but that one or more Market Participants did not report data provided by these recordings to the NYISO, as required by these NYISO procedures.
□ Non-Compliance Level 2	Not Applicable
□ Non-Compliance Level 3	The NYISO certified that one or more Market Participants did not comply with NYISO requirements by failing to install disturbance recording devices as required by NYISO procedures.
□ Non-Compliance Level 4	Not Applicable

RESOURCE, SYSTEM & DEMAND DATA REQUIREMENTS C-M14

Reliability Rule Reference

C-R2 Generating Unit Availability and Special Case Resource Performance

Measurement

- C-M14 The NYISO shall establish, maintain and follow procedures to address Responsible Interface Party reporting requirements for submitting performance data for all installed capacity associated with Special Case Resources (SCRs), and requirements for calculating SCR performance. These procedures shall be designed to provide estimates of the amount of load reduction that can be expected at the time of a SCR activation for supporting NYSRC and NYISO reliability studies. NYISO SCR performance data reporting and calculation procedures shall include the following requirements:
 - 1. Reporting requirements and instructions for Responsible Interface Parties to provide SCR performance data to the NYISO. These instructions shall include requirements that Responsible Interface Parties report data for any SCR that was required to provide load reduction for NYISO-deployed test or event.
 - 2. Reporting schedules for Responsible Interface Parties to provide SCR performance data to the NYISO.
 - 3. NYISO procedures for calculating and measuring SCR performance based on data received from the Responsible Interface Parties (Requirements #1 and #2).
 - 4. An annual report that presents SCR performance results for the most recent Capability Year, prepared in accordance with Requirement #3 and specified by the NYSRC. The report shall be submitted to the NYSRC in accordance with NYSRC time schedules, no earlier than 90 days after the end of the Capability Year.

Compliance Monitoring Process

Reliability Rule Reference

E-R10 Exceptions to the NYSRC Reliability Rules

Measurement

E-M9

The NYISO shall implement actions required for granting new exceptions or modifying or removing current exceptions, as described in NYSRC Policy 1, Procedure for Reviewing, Developing, Modifying, and Disseminating NYSRC Reliability Rules. These required NYISO actions shall include:

- 1. Request each Transmission Owner, at least annually, to assess its exceptions and to determine whether it wishes to request the NYSRC to grant a new exception or modify or remove a current exception.
- 2. Implementation of a request from the NYSRC to review an application for a new exception or the renewal or modification of a current exception that:
- The NYSRC has received directly from a Market Participant or
- The NYSRC has received from a Transmission Owner via the Annual Exception Review.
- 3. Following its review pursuant to E-M9.2, the NYISO shall notify the NYSRC if it recommends that the NYSRC approve the granting of the new exception, or whether the current exception should be removed or modified as proposed. The NYISO shall document the reasons for its recommendation, including a finding that there would be no adverse impact to reliability upon issuance of the new exception or removal or modification of the current exception. If the NYISO recommends that the exception request should be rejected by the NYSRC, the NYISO shall document its reasons for such a recommendation.

Measurement

F-M2 The NYISO shall report to the NYSRC on every instance of a major emergency. Included in this report shall be a description of the incident, a summary of conditions that warranted the change to a major emergency state, a summary of actions taken, and the effectiveness of those actions. A preliminary report shall be provided to the NYSRC within one week of the incident; and a final report, if requested by the NYSRC, shall be provided within one month following the incident.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility:

NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: As Required

□ Full (100%) Compliance	The NYISO provided a preliminary report of major emergencies within one week of an incident. I addition, if requested by the NYSRC, a final report was provided within one month following the incident. These reports were prepared in accordance with Measurement F-M2 and demonstrate what NYISO actions were taken and their effectiveness for meeting NYSRC Reliability Rules.
□ Non-Compliance Level 1	Not applicable.
☐ Non-Compliance Level 2	The required reports were provided following a major emergency, but at least one report was incomplete in one or more areas.
□ Non-Compliance Level 3	The required major emergency reports were provided, but a review indicated that the NYCA system was not operated in accordance with NYSRC Reliability Rules.
□ Non-Compliance Level 4	At least one of the required major emergency reports was not provided following a reportable incident.

OPERATION DURING MAJOR EMERGENCIES

F-M3

Reliability Rule Reference

F-R8 Load Shedding Allocation

Measurement

F-M3 The NYISO shall maintain procedures and systems that ensure that sufficient load shedding capability exists for both manual and automatic response. The NYISO must notify the NYSRC of any changes to these procedures and systems.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility:

NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: On Request

The NYISO maintained procedures for ensuring that sufficient
load shedding capability exists in accordance with Measurement
F-M3. These procedures included transmission owner reporting
requirements (see F-M4) and the conduct of NYISO analyses to
ensure that sufficient load shedding is available to meet the load
shedding requirements.
Not applicable.
Procedures for ensuring that sufficient load shedding capability
exists were provided, but were incomplete in one or more areas.
The required procedures were complete; however, analyses to
ensure that sufficient load shedding is available were incomplete.
The required procedures were not provided.

OPERATION DURING MAJOR EMERGENCIES

F-M4

Reliability Rule Reference

F-R8 Load Shedding Allocation

Measurement

F-M4 Each transmission owner shall report to the NYISO the amount of load that is expected to be shed through automatic and manual load shedding, coincident with the peak load of its transmission district in accordance with NYISO procedures (see Measurement F-M3). The NYISO shall annually report compliance of this requirement to the NYSRC.

SYSTEM RESTORATION

G-M1

Reliability Rule Reference

G-R1 System Restoration Plan

Measurement

- G-M1 The NYISO shall develop and maintain a NYCA System Restoration Plan (NYCA SRP) that will assure the prompt restoration of the NYCA system following a major or total blackout. The NYCA SRP shall define that system restoration take place at two integrated levels: restoration of the NYCA backbone system in accordance with a NYISO System Restoration Plan (NYISO SRP) and restoration of local areas in accordance with transmission owner system restoration plans (transmission owner SRPs). The NYCA SRP shall include the following minimum requirements:
 - 1. Procedures for coordinating the *NYISO* SRP and the *transmission owner* SRPs.
 - 2. Required actions to be included in each transmission owner's restoration plan, consistent with *NYISO* procedures and *NYSRC*, NPCC, and NERC criteria.
 - 3. Procedures for coordinating the SRPs of the *NYISO* and neighboring Reliability Coordinators, including restoration of interconnections.
 - 4. Identification of *blackstart facilities* required for implementing the NYISO SRP, including the names, location, megawatt capabilities, megavar capabilities, and unit type.
 - 5. Procedures for black start facility test requirements to verify that each black start unit in the NYISO and Transmission Owner SRPs is capable of meeting the requirements of these SRPs. These black start testing requirements shall include:

Gas turbine, combined cycle, and hydro black start units:

Each Black Start Provider shall complete a successful test of the startup and operation of each of those black start facilities included in the NYISO and Transmission Owner SRPs for each Capability Year.

The NYISO shall determine the number of units within a black start facility that shall be tested annually.

Steam black start units:

Each Black Start Provider shall complete a successful test of the startup and synchronization to the transmission system of each unit included in the NYCA SRP every three Capability Years.

In addition, completion of successful tests requiring isolation from the transmission system, but not requiring startup and synchronization with the transmission system, shall be conducted during each intervening Capability Year. This intervening year test shall be conducted as follows: 1) a black start gas turbine isolated from the

transmission system shall energize the internal light and power bus of the steam black start unit; and 2)_auxiliary loads required to introduce fire into the boiler (fans, pumps, etc.) shall be added to the internal light and power bus. The intervening year test does not require fire in the boiler or synchronization to the transmission system.

The NYISO shall designate which steam units shall be tested during each Capability Year in accordance with the above testing requirements.

The NYISO shall determine the time within the Capability Year that testing shall be completed.

The NYISO procedures shall indicate that with due regard for reliability considerations and subject to approval by the Transmission Owner and the NYISO, a test performed by black start facilities in the Transmission Owner's SRP within one month beyond the Capability Year test period, or longer in force majeure cases, shall be considered a valid test for that Capability Year. On request by the NYSRC, the NYISO shall certify that reliability was considered when the NYISO and the Transmission Owner approved black start facility testing beyond the Capability Year.

- 6. Procedures requiring that each transmission owner identify *blackstart* resources that are necessary for implementing its SRP. These procedures shall also require transmission owners to identify the name, location, megawatt capacity, megavar capacity, and type of *blackstart* resource(s). The identity of transmission SRP *blackstart facilities* shall be made available to the *NYISO* and to affected *transmission owners*. In addition, *NYISO* procedures shall include a requirement that each *Blackstart Provider* annually provide a letter to the *NYISO* confirming that it identifies and maintains a list of critical components in its facilities (i.e., batteries, diesel back-up generators, inverters etc.) to verify the condition of these critical components in accordance with good industry practice.
- 7. Identification of the necessary operating instructions and procedures to cover loss of telecommunications channels during a system disturbance.
- 8. Identification of protocols for disseminating information to operating entities identified in the plan during a system disturbance.
- 9. Procedures for ensuring that the coordination of *NYISO* and *transmission owner* SRPs be demonstrated by drill or by simulation.
- 10. Procedures requiring *transmission owners* to notify the *NYISO* of any proposed changes to *transmission owner* SRP facilities or procedures that could effect the coordination of the *NYISO* and *TO* restoration plans at least two months prior to their implementation.
- 11. Procedures requiring that the *NYISO* and *transmission owner* SRPs be reviewed and updated annually and whenever changes are made in the *NYS Power System*. This review shall evaluate the impact of planned system expansion or reconfiguration on these SRPs,

prior to implementation.

- 12. Identification of guidelines which provide the basis for alternative restoration actions if normal restoration procedures cannot be executed due to system conditions.
- 13. Procedures for coordinating annual updates to the *NYISO* SRP and restoration plans of neighboring Reliability Coordinators. (G-R1)

☐ Full (100%) Compliance	The NYISO certified that each transmission owner has a SRP in accordance with G-M1, G-M2, and NYISO procedures.
□ Non-Compliance Level 1	The NYISO certified that one or more transmission owners failed to comply with one requirement within G-M1, G-M2, or NYISO procedures.
□ Non-Compliance Level 2	The NYISO certified that one or more transmission owners failed to comply with two requirements within G-M1, G-M2, or NYISO procedures.
□ Non-Compliance Level 3	The NYISO certified that one or more transmission owners failed to comply with three requirements within G-M1, G-M2, or NYISO procedures.
□ Non-Compliance Level 4	The NYISO certified that one or more transmission owners failed to comply with four or more requirements within G-M1, G-M2, or NYISO procedures.

SYSTEM RESTORATION

G-M3

Reliability Rule Reference

G-R1 Emergency Restoration Procedures

G-R2 Restoration Training and Simulation Programs

Measurement

G-M3 Each Black Start Provider shall develop and implement appropriate test procedures in accordance with G-M1, G-M2, and NYISO requirements and procedures to ensure those black start facilities that are included in the NYISO's and transmission owner's SRPs are able to perform their intended functions. These black start testing requirements shall include:

Gas turbine, combined cycle, and hydro black start units:

Each Black Start Provider shall complete a successful test of the startup and operation of each of those black start facilities included in the NYISO and Transmission Owner SRPs for each Capability Year.

The NYISO will specify the number of units within a black start facility that shall be tested annually.

Steam black start units:

Each Black Start Provider shall complete a successful test of the startup and synchronization to the transmission system of each unit included in the NYCA SRP every three Capability Years.

In addition, completion of successful tests requiring isolation from the transmission system, but not requiring startup and synchronization with the transmission system, shall be conducted during each intervening Capability Year. This intervening year test shall be conducted as follows: 1) a black start gas turbine isolated from the transmission system shall energize the internal light and power bus of the steam black start unit; and 2) auxiliary loads required to introduce fire into the boiler (fans, pumps, etc.) shall be added to the internal light and power bus. The intervening year test does not require fire in the boiler or synchronization to the transmission system.

The NYISO will specify which steam units shall be tested during each Capability Year in accordance with the above testing requirements.

With due regard for reliability considerations and subject to approval by the Transmission Owner and the NYISO, a test performed by black start facilities in the Transmission Owner's SRP within one month beyond the Capability Year test period, or longer in force majeure cases, shall be considered a valid test for that Capability Year. Each Black Start Provider shall provide documentation of these test results to the appropriate entity in accordance with NYISO and transmission owner procedures.

In addition, each Black Start Provider shall annually provide a letter to the NYISO

confirming that it identifies and maintains a list of critical components in its facilities (i.e., batteries, diesel back-up generators, inverters etc.) and performs tests to verify the condition of these critical components in accordance with good industry practice. Test results will be provided to the NYISO upon request. Black Start Providers shall attend NYISO and transmission owner restoration training as required.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility: Black Start Provider

Compliance Monitoring Responsibility:

1. Review of Black Start Provider Compliance Documentation – NYISO

2. Review of NYISO Compliance Certification – RCMS

Compliance Documentation Reporting Frequency: On Request

□ Full (100%) Compliance	As defined in G-M1, G-M3, and G-M4, the NYISO certified that for the Capability Year specified by the NYSRC: (1) it received the annual letter from each Black Start Provider confirming that it maintained a list of critical components and tests these components accordingly, (2) it received sufficient documentation from each Black Start Provider showing that the Black Start Provider developed required test procedures and accordingly successfully tested its black start facilities for each Capability Year, and (3) each Black Start Provider met NYISO training requirements.
□ Non-Compliance Level 1	The NYISO certified that, for the Capability Year specified by the NYSRC, one Black Start Provider did not provide a letter to the NYISO satisfying required testing of critical facility components, or did not comply with black start facility testing requirements in accordance with G-M1, G-M2, & G-M3, and NYISO or transmission owner procedures.
□ Non-Compliance Level 2	The NYISO certified that, for the Capability Year specified by the NYSRC, two Black Start Providers did not provide a letter to the NYISO satisfying required testing of critical facility components, or did not comply with black start facility testing requirements in accordance with G-M1, G-M2, G-M3, and NYISO or transmission owner procedures and schedules.
□ Non-Compliance Level 3	The NYISO certified that, for the Capability Year specified by the NYSRC, three Black Start Providers did not provide a letter to the NYISO satisfying required testing of critical facility components, or did not comply with black start facility testing requirements in accordance with G-M1, G-M2, G-M3, and NYISO or transmission owner procedures and schedules. OR

	The NYISO certified that one or more Black Start Providers failed to attend restoration training as required by the NYISO or transmission owner.
□ Non-Compliance Level 4	The NYISO certified that, for the Capability Year specified by the NYSRC, four or more Black Start Providers did not provide a letter to the NYISO satisfying required testing of critical facility components, or did not comply with black start facility testing requirements in accordance with G-M1, G-M2, G-M3, and NYISO or transmission owner procedures or schedules.

Develor of Comphanice	
☐ Full (100%) Compliance	The NYISO established procedures for NYISO to Market
	Participant communications such that communications are
	consistent, efficient, and effective during normal and emergency
	conditions. These procedures included requirements for enabling
	operation to continue during loss of communication facilities,
	including specific requirements of Reliability Rules J-R1 and J-
	R2 and NPCC and NERC criteria.
□ Non-Compliance Level 1	Not applicable.
□ Non-Compliance Level 2	NYISO operator communications procedures have been
_	developed, but they do not include all of the required items.
□ Non-Compliance Level 3	Not applicable.
□ Non-Compliance Level 4	There are no NYISO communications procedures in place.

NYISO CONTROL CENTER COMMUNICATIONS

J-M2

Reliability Rule Reference

J-R2 NYISO Communications Under Emergency Conditions

Measurement

J-M2 The NYISO shall prepare reports summarizing performance data of control center communication interfaces. These reports shall be provided to the NYSRC on request or when significant changes are made, and shall include a tracking basis of historical performance of voice and data communication equipment.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility: NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: On Request

☐ Full (100%) Compliance	When requested, the NYISO provided the NYSRC reports
_	providing performance data of control center communications
	interfaces in accordance with Measurement J-M2.
□ Non-Compliance Level 1	Not applicable.
□ Non-Compliance Level 2	The required NYISO report was provided when requested, but
_	was incomplete in one or more areas.
□ Non-Compliance Level 3	Not applicable.
☐ Non-Compliance Level 4	The required NYISO report was not provided when requested.

NYISO CONTROL CENTER COMMUNICATIONS

J-M3

Reliability Rule Reference

J-R2 NYISO Communications Under Emergency Conditions

Measurement

J-M3 The NYISO shall provide to the NYSRC within one month a report summarizing any loss of critical voice and/or data systems. The report shall describe the problem and its relationship to the control of the NYS Bulk Power System, the cause of the problem, the corrective action, and implementation schedule.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility: NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: As Required

☐ Full (100%) Compliance	The NYISO provided to the NYSRC a report of the loss of
_	critical voice and data systems in accordance with Measurement
	J-M3.
□ Non-Compliance Level 1	Not applicable.
☐ Non-Compliance Level 2	The required NYISO report was provided, but was incomplete in
_	one or more areas.
□ Non-Compliance Level 3	Not applicable.
□ Non-Compliance Level 4	The required NYISO report was not provided.

RELIABILITY ASSESSMENT

K-M1

Reliability Rule Reference

K-R1 NYISO Manuals

Measurement

K-M1 The NYISO Planning and Operating Manuals shall be prepared by the NYISO in conformance with the Reliability Rules and submitted to the NYSRC for compliance review on request.

Compliance Monitoring Process

NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: On Request

☐ Full (100%) Compliance	In accordance with Measurement K-M1, the NYISO provided the
_	NYSRC with a self assessment on the compliance of its planning
	and operating manuals with the Reliability Rules. The scope of
	these self assessments were based on NYSRC guidelines.
☐ Non-Compliance Level 1	Not applicable.
□ Non-Compliance Level 2	A self assessment was provided, but was incomplete in one or
	more areas.
□ Non-Compliance Level 3	The self assessment shows that procedure(s) in the manual do not
	meet Reliability Rules.
☐ Non-Compliance Level 4	The self-assessment was not provided.

RELIABILITY ASSESSMENT

K-M2.a

Reliability Rule Reference

K-R2 Reliability Assessments

Measurement

K-M2.a

The NYISO shall conduct, and provide to the NYSRC, the following reliability assessment:

A transmission review to demonstrate that the planned NYCA transmission system is in conformance with NYSRC Reliability Rules. Specifically, the transmission review shall incorporate assessments for documenting NYISO compliance with the following NYSRC measurements:

- 1. Measurement B-M1 Thermal, voltage, stability, and short circuit assessments.
- 2. Measurement B-M2 Extreme contingency assessment.
- 3. Measurement B-M3 Compatibility with the NYCA system restoration plan.
- 4. Measurement I-M4 Compatibility with NYSRC Local Rules.
- 5. Measurement K-M3 Extreme system conditions.

The NYCA transmission review and its accompanying assessments shall cover the 4-6 year planning horizon and shall be prepared annually. The B-M1, B-M2 and K-M3 assessments shall cover system performance results of simulation tests and shall include all supporting documentation specified in NPCC Document B-4, *Guidelines for NPCC Area Transmission Review*, which shall be supplemented to include additional documentation that may be requested by the NYSRC.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility:

NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: Annually

☐ Full (100%) Compliance	The NYISO prepared the annual assessment of the NYCA in
	accordance with Measurement K-M2a, which demonstrates that
	the performance of the NYCA system is in compliance with
	Reliability Rules B-R1, B-R2, B-R3, B-R4, and B-R7 as required
	by Measurements B-M1 and B-M2. The format of the report was
	consistent with NPCC Guideline B-4 requirements.

□ Non-Compliance Level 1	A NYCA Transmission Review was submitted, but did not fully
_	meet NPCC Document B-4 requirements.
□ Non-Compliance Level 2	The NYCA Transmission Review that was submitted found that
	the NYCA planned transmission system was in non-compliance
	with NYSRC Reliability Rules B-R1. B-R2. B-R3, and/or B-R4
	in one or more instances. The NYISO submitted an acceptable
	plan and schedule for addressing the instances of non-compliance.
□ Non-Compliance Level 3	The NYCA Transmission Review that was submitted found that
	the NYCA planned transmission system was in non-compliance
	with NYSRC Reliability Rules B-R1. B-R2. B-R3, and/or B-R4
	in one or more instances. However, either the NYISO failed to
	submit a plan and schedule for addressing the instances of non-
	compliance, or the plan that was submitted was found to be
	unacceptable
□ Non-Compliance Level 4	A NYCA transmission review was not submitted.

RELIABILITY ASSESSMENT

K-M2.b

Reliability Rule Reference

K-R2 Reliability Assessments

Measurement

K-M2.b The NYISO shall conduct, and provide to the NYSRC, the following reliability assessment:

A NYCA resource adequacy assessment for the next summer period and two years beyond, for demonstrating next capability period compliance with the NYSRC installed reserve margin requirement and NYISO locational installed capacity requirements, and prospective future compliance. The assessment shall include statewide and New York City and Long Island resource adequacy.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility:

NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: Annually

☐ Full (100%) Compliance	The NYISO submitted the annual NYCA resource adequacy assessment report to the NYSRC in accordance with Measurement K-M2.b. During a year when the NYISO was required by NPCC to submit a New York Area Resource Adequacy Study, submission of that report to the NYSRC for compliance review would meet this requirement.
□ Non-Compliance Level 1	Not applicable.
□ Non-Compliance Level 2	A NYCA resource adequacy assessment was submitted to the NYSRC, but the report was deficient in one or more areas.
□ Non-Compliance Level 3	Not applicable.
☐ Non-Compliance Level 4	A NYCA resource adequacy assessment was not submitted to the NYSRC.

RELIABILITY ASSESSMENT

K-M2.c

Reliability Rule Reference

K-R2 Reliability Assessments

Measurement

K-M2.c The NYISO shall conduct, and provide to the NYSRC, the following reliability assessment:

Interregional reliability assessments for ensuring that the NYCA inter-control area and internal transmission system is developed on a coordinated basis. Reports on these assessments shall be provided as requested by the NYSRC.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility:

NYISO

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: On Request

20,000 01 000000000		
☐ Full (100%) Compliance	The NYISO provided to the NYSRC interregional assessments in accordance with Measurement K-M2.c. As requested by the NYSRC, these reports were either NPCC interregional assessments having NYISO participation, studies sponsored by the NYISO, or special studies prepared by the NYISO as required by the NYSRC.	
☐ Non-Compliance Level 1	Not applicable.	
□ Non-Compliance Level 2	Requested interregional reliability assessments were provided, but were incomplete in one or more areas.	
□ Non-Compliance Level 3	Not applicable.	
☐ Non-Compliance Level 4	Requested interregional reliability assessments were not provided.	

RELIABILITY ASSESSMENT

K-M2.d

Reliability Rule Reference

K-R2 Reliability Assessments

Measurement

K-M2.d

The NYISO shall provide a monthly operations report that provides data on the performance of the NYCA for the previous month, covering the following requirements:

- 1. Occurrences of major emergency and alert states.
- 2. Summary of the NERC/NPCC Control Performance.
- 3. A list of NPCC Reportable Events.
- 4. Reserve requirements and actual reserves for the monthly peak load hour for all reserve categories (10 minute synchronized, 10 minute non-synchronized, and 30 minute operating reserves.) The report shall distinguish between supply and demand side resources. (D-R1 through D-R3)
- 5. The response of the system to activations of reserve, including: the number of occasions reserves were activated in the month, reasons for the reserve activations, number of occasions within the month in which the reserve activation did not result in an area control error ("ACE") zero crossing, number of non-zero crossings associated with a unit loss, and number of non-zero crossings requiring another reserve activation. (D-R4)
- 6. Performance of the transmission system (E-R1 through E-R4), with respect to the number of events resulting in facilities exceeded system operating limits resulting in Alert States or Major Emergencies, including pre-contingency thermal and voltage limits, post-contingency thermal and voltage limits, and stability limits.
- 7. A report of the number of more stringent events in which operating restrictions were imposed, resulting in an Alert or Major Emergency State due to severe weather conditions and/or severe solar magnetic *disturbances*. (E-R6, R7)
- 8. Emergency actions initiated, including: emergency assistance from neighboring Control Areas, manual (local) voltage reductions, quick response (remote control) voltage reductions (5 and 8%), voluntary load curtailment, public appeals, Special Case Resources, Emergency Demand Response Program, and load shedding. For each emergency action the report shall include: (a) the date of the emergency action; (b) the zone(s) where the emergency action was implemented; (c) an estimate of the MW capacity addition or load relief achieved, by zone; and (d) the reason(s) why the emergency action was implemented. (F-R5)
- 9. Other analyses and indices identified by the *NYSRC* Executive Committee for monitoring the *security* of the system.

☐ Non-Compliance Level 1	Not applicable.
□ Non-Compliance Level 2	Not applicable.
□ Non-Compliance Level 3	Not applicable.
□ Non-Compliance Level 4	The NYISO did not provide the NYSRC with a copy of the
	requested reliability assessment.

Extreme System Conditions Assessment

K-M3

Reliability Rule Reference

K-R3 Extreme System Conditions Assessment

Measurement

K-M3 The NYISO shall incorporate special simulation testing to assess the impact of Extreme System Conditions on the NYS Bulk Power System, and where appropriate, develop plans to mitigate the consequences that are indicated by these assessments. These tests shall show the impacts on steady state and dynamic performance of extreme condition events "a" and "b" specified in Reliability Rule K-R3. The scope of these studies shall meet NPCC guidelines for transmission and resource adequacy assessments. The NYISO shall report the results of these assessments, including evaluations of mitigation measures for any cases that conclude serious consequences, as part of NYCA transmission and resource adequacy assessments required by Measurement K-M2.

Compliance Monitoring Process

Compliance Documentation Reporting Responsibility:

Compliance Monitoring Responsibility: Review of NYISO

Compliance Documentation – RCMS

Compliance Monitoring Reporting Frequency: Annually

□ Full (100%) Compliance	The NYISO assessed the impact of Extreme System Conditions and developed plans to mitigate the consequences of such impacts, in accordance with Measurement K-M3. The results of these assessments were included in NYISO reports covering annual NYCA transmission and resource adequacy assessments, required by Measurement K-M2.
□ Non-Compliance Level 1	An Extreme System Condition assessment and mitigation plans for all specified events were included in the NYCA transmission or resource adequacy assessment report, but was incomplete in meeting NYSRC requirements or NPCC transmission or resource adequacy guidelines.
□ Non-Compliance Level 2	An Extreme System Condition assessment was submitted for all specified events, but mitigation plans were not included or were found unacceptable.
□ Non-Compliance Level 3	An Extreme System Condition assessment was submitted, but did not include evaluations and mitigation plans for all specified events.
□ Non-Compliance Level 4	An Extreme System Condition assessment was not submitted.
