Reliability Rule I.4 Narrative (R3)

The NYISO is in full compliance with I.4 (R3). Procedures in the Reliability Analysis Data Manual were followed to update the load flow, short circuit and stability data using Market Participant and Developer input as documented in the NYISO 2022 FERC Form No. 715 filing (April 1, 2022), and to update databases on an ongoing basis as system changes warranted.

Requests by the NYISO for data verification or correction were responded to by the designated Market Participants and Developers.
