Request to Develop or Modify Reliability Rules and Requirements (NYSRC Policy No. 1-11) Submit request to Herb Schrayshuen (herb@poweradvisorsllc.com) via the NYSRC site www.nysrc.org

1. PRR No. & Title of Reliability Rule or Requirement change 2. Rule Change Requester Information Name RRS Organization 3. New rule or revision to existing rule? 4. Need for rule change, including advantages and disadvantages 4. Need for rule change, including devices have been included in the NYISO's interconnection process and periodic transmission planning/operating studies on an ad-hoc basis. Based on the proliferation of inverter-based resources, as well as applications of active series/shunt compensation and HVDC connections to the NYCs system, it is proposed to include a requirement for special studies in the NYSRC Reliability Rules. 5. Related NYSRC rules N/A NYISO interconnection requirement studies shall include, as applicable, special studies to examine the impacts of dynamically active technologies.
