Request to Develop or Modify Reliability Rules and Requirements (NYSRC Policy No. 1-11) Submit request to Herb Schrayshuen (herb@poweradvisorsllc.com) via the NYSRC site www.nysrc.org

Item		Info	ormation			
1. PRR No. & Title of	Р	PRR 153: Sudden loss of solar & wind and fuel delivery systems				
Reliability Rule or	, , , , , , , , , , , , , , , , , , , ,					
Requirement change						
2. Rule Change Requester						
Information						
Name	RRS					
Organization	NYSRC					
3. New rule or revision to	Revision to	B.1 - Transmission System Plan	nning Performanc	e Requirements, R1 -		
existing rule?	Transmissio	Transmission facilities in the NYS Bulk Power System shall be planned to meet the				
	respective performance requirements in Table B-1 and supplemental performance					
	requirements in Table B-2 for the contingency events as specified in Table B-1.					
4. Need for rule change,	Sudden loss	Sudden loss of fuel delivery system to multiple plants is currently included as an Extreme				
including advantages and	Contingenc	Contingency in NYSRC Reliability Rules Table B-3. This rule is proposing to add design				
disadvantages	criteria contingencies of the sudden loss of generation due to weather (i.e., loss of wind					
	and solar u	and solar units). It is proposed to make these design criteria contingencies in Table B-1,				
	Category I and Category II contingencies.					
		3, 3, 3, 3, 3, 3, 3, 3, 3, 3, 3, 3, 3, 3				
	The proposed contingency for the sudden loss of generation due to weather is based on					
	the burgeo	ning development of wind and	solar resources in	NYCA. The advantage of		
	this change for system reliability is that it will properly represent the variable nature of					
	the fuel sup	the fuel supplying these resources.				
	There are n	There are no disadvantages.
