## **1&2 Roll Call and Request for Additional Agenda Items – W. Gunther / B. Shanahan**

- No additional Agenda items.

### **3. Approval of Minutes for Meeting #290**

- Meeting minutes for previous meeting #290 were approved with no changes.

### **4. Review of Action Item List – H. Kosei**

- List is unchanged from previous meeting.

### **5. Chair update on recent EC actions**

- EC approved change in ICS Chair from Howard Kosei (ConEd) to William Gunther (ConEd) due to change in roles within Con Ed.

### **6. Tan45 Methodology Review – L. Carr**

- Updated results were presented from test cases along with a summary review of the existing Tan45 process.
- ICS discussed various Cases and permutations to be studied, particularly CHPE, the LI PPTN, OSW and various Solar combinations.
- Alternative Low Point Analysis

- Unforced Capacity Reserve Margin (URM) Analysis
- NYISO will take recommendations from today's discussion and run a reasonable set of analysis.

## **7. BTM Solar Modeling and Impact Assessment – M. Lucas**

NYISO presented the combined effect of the alternative load shape adjustment methodology and explicitly modeling BTM solar as DSM units, avoiding the large IRM shifts seen earlier in the year. The combined effect reduced the IRM by 0.6% and increased the LCRs. For base case sensitivities, modeling only BTM solar as a DSM unit was preferred.

## **8. Topology Update – A. Mohammed**

NYISO presented updated topology for the 2025/26 IRM: West Central reverse limit & Central East forward limit as well as the Dover PAR status.

- Dover PAR in service June 2025
- UPNY/SENY transfer limit of 7,150 MW recommended to be used in 2025-26 IRM FBC reflecting inclusion of all Segment B work.
- The West Central reverse limit was updated from 2,275 MW to 2,200 MW with no IRM or LCR impact based upon testing on the 2024-2025 FBC.
- The Central East forward limit was updated with a 75 MW derate for an outage of the Marcy STATCOM for all Oswego complex combinations. There is no IRM impact due to this change based upon testing on the 2024-2025 FBC.
- The UPNY/SENY limit remains unchanged. Prior work suggested including the Dover PAR outage would not change the limit, but obtaining regular formal studies of such limits is of interest.
- NYISO will return to ICS with any updates to the topology to reflect the expected Dover PAR status.

NYISO proposes to no longer seek TPAS review and approval of proposed IRM topology updates and instead leverage SOAS/OC approvals for limits and studies that originate from NYISO Operations. Proposed IRM topology updates will continue to be reviewed with ICS for approval by the Executive Committee. There were no objections.

## **9. 2025/26 IRM PBC Parametric Results – B. Prinsloo**

Adding the 3 new solar generators increased the IRM by 0.86% and other changes were non-material. The completed PBC results will be available at the next meeting.

## **10. 2025/26 IRM PBC Assumptions Matrix – B. Prinsloo**

NYISO presented the completed assumptions matrix and added notes to incorporate other updates from this meeting. ICS approved the updated assumption matrix with these changes and will repost as a redline version v5.1.

## **11. Proposed Sensitivities for IRM 2025-2026 PBC – H. Fox**

Several parties recommended dropping Sensitivity 4a as its largely redundant to 4b and due to confidentiality concerns. It was proposed to just use a single sensitivity (4), for loss of wind in general.

The winter gas constraints sensitivity would mirror the recently completed whitepaper but start from the current PBC and focus on two firm oil levels, e.g., NYISO's estimate of 11,000 MW and a lower number such as 8,000 MW.

## **12. NYSRC Recommendations for Adoption – G. Jordan**

Gary Jordan proposed and ICS accepted the following changes for the PBC:

- Limit voluntary curtailment and public appeals to 3 calls/year
- Switch to 10-year cable transition rates
- Apply line specific limits to the HVDC lines importing from PJM to the localities and extend the PJM dynamic EA group to include PJM G ties. The proposed PJM limits would not limit capacity sold over the lines and would only apply to emergency assistance.

The proposed changes increase the IRM by 0.27%, J LCR by 3.54%, K LCR by -0.09%, and G-J Locality by 2.58% based upon testing on the 2024-2025 FBC.

## **13. Additional Agenda Items**

None.

### **Next Meeting**

**Meeting #292 –Wednesday, July 30th, 2024, 10 am – NYISO KCC**
