

NEW YORK STATE RELIABILITY COUNCIL
NERC RELIABILITY STANDARD BALLOTTING SUMMARY

Standard Topical Area	Reliability Standard Title and Standard Numbers	SAR or Standard	NYSRC in Ballot Pool?	Standard Status
Project 2023-01 IBR Event Reporting EOP-004 Draft2	The current EOP-004, uses relatively large size thresholds more suitable for synchronous generation; however, NERC and the Regional Entities have analyzed multiple widespread solar PV loss events (some also involving other generation losses as well) across a large number of resources that did not meet the EOP-004 criteria, yet have highlighted systemic reliability risks posed by IBRs that should be reported by applicable entities	Standard	Yes	Balloting Period 1/5/26 – 1/14/26 Solicitation sent to EC on 11/26/25
Project 2024-02 Planning Energy Assurance TPL-001-5.1	This project will enhance reliability by requiring industry to perform energy reliability assessments for the planning (>one year) time horizon to evaluate energy assurance and when predefined criteria are not met, develop Corrective Action Plan(s), Operating Plans, or other mitigating actions to address identified risks.	Standard	Yes	Ballot Period 12/01/25-12/10/25 Solicitation sent to EC on 11/3/25 NYSRC voted favorable Ballot failed 17.7% favorable
