- Recent balloting results on NERC Standard Projects was reviewed.

8.0 Reports

8.1 NYSRC EC June Meeting Report - W. Yeomans

- A brief summary of EC discussion was provided, particularly concerning the subject of the potential reliability impact of new large loads.

8.2 NYSRC ICS Meeting Report - [icon] B. Shanahan

- NYISO presented Preliminary Base Case Tan45 results, showing an increase in IRM of almost 3% due to various factors, such as including Winter Fuel Constraint modeling,

BTM Solar and load modeling, and inclusion of the CHPE project.in the 2026-2027 IRM Study Load Zone J LCR also is shown to increase by 5%. NYISO also presented preliminary Sensitivity Study subjects of which alternate evaluation of CHPE & Hudson Barge retirements would be considered. The PBC Tan45 also identified a (for now) small LOLE impact in the Winter season for the first time.

9.0 Next Meeting

Meeting #300 was adjourned at 11:21 AM.

Next Meeting #301: Thursday, September 4, 2025 @ 10:00 AM – Remote - **Web Ex**
