

NYSRC – LLWG Update for EC

October 2026

- LLWG continues to monitor activities across key regulatory and industry organizations, including FERC, NERC, the PSC, NYISO, and IEEE.
 - o While no active LLWG work products or initiatives are currently underway, the group remains engaged and prepared to address emerging issues as needed. The LLWG and Reliability Rules Subcommittee (RRS) continue to solicit member input on emerging topics, industry developments, and potential areas requiring future review or action.
- **DPS Large Load and Data Center Interconnection Technical Working Group (ITWG)** does not currently have their next meeting scheduled.
 - o <https://dps.ny.gov/large-load-and-data-center-interconnection-technical-working-group>
- **NERC Project 2026-02 (Computational Loads):** Initial balloting concluded on September 18, 2026, with all proposed standards (CLO-001 through CLO-003 and FAC-001/FAC-002 revisions) and associated implementation plans receiving strong stakeholder approval. The drafting team is currently reviewing comments and determining next steps.
- **NYISO** presented the latest on the Show Cause response on 10/1/2026:
 - o BELL is now called the LLIP (Large Load Interconnection Procedures)
 - o Draft tariff wording was posted and presented to stakeholders
 - o https://www.nyiso.com/documents/20142/59263544/10a_Large_Load_Show_Cause_Order_100126_vfinal.pdf/aa2fe1b7-aa7b-6675-7881-8a3e19d3102f
- **NYISO** has several upcoming Large Load meetings for October, including BIC on 10/21 (see below). As always, check <https://www.nyiso.com/calendar> for latest updates
